

International Post Graduate Program in **Diabetes Mellitus Management**

Indo Global Cardio Diabetes Academy

International Post Graduate Program in Diabetes Mellitus Management

Indo Global Cardio Diabetes Academy

Introduction

Elevate your expertise in diabetes mellitus management with OC Academy's intensive International Post Graduate Program. Designed for practising physicians aiming to specialise or enhance their skills in diabetes care, this comprehensive course combines an immersive **9-month online curriculum with a 3-month clinical experience**. It provides a robust foundation for diagnosing, managing, and preventing diabetes and related metabolic disorders, enhancing critical decision-making skills for complex patient care.

The program has three distinct components, each offering a unique and valuable perspective on diabetes care, as explained below:

1. Certification Course in Diabetes and Metabolic Disorder Care

This foundational course covers all essential topics within the realm of endocrine and metabolic disorders care, with a core focus on diabetes. Developed in the UK by the NHS England, and the Royal Colleges of General Practitioners, it features expert-authored e-learning materials, ensuring evidence-based knowledge for modern clinical practice.

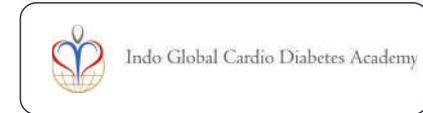

Key Topics:

- Oral hypoglycaemics
- Insulin management (Fundamentals)
- Diabetic Kidney Disease
- Hyperthyroidism
- Testosterone Deficiency & Male Hypogonadism
- Calcium & bone metabolism disorders

2. Advanced Interactive Program

The program features a rigorous and evidence-based curriculum designed to provide in-depth training across a spectrum of diabetes management. Professionals will acquire advanced knowledge and refine their clinical reasoning skills through a blend of didactic lectures, case-based discussions, and interactive learning modules.

The curriculum is accredited by CPD and the Indo Global Cardio Diabetes Academy, ensuring the highest quality education and recognition in diabetes management.

Key Topics:

- Microvascular Complications of Diabetes Mellitus Management
- Insulin – Past, Present and Future (Advanced Concepts)
- Diabetes and Cardiac Co-morbidities
- Gestational Diabetes Management
- Incretin mimetics and Other weight Management Strategies
- Pancreas and Islet Cell Transplantation in Type 1 Diabetes

3. Clinical Training

3-month observership, providing professionals with hands-on experience in leading hospitals and specialised diabetes care centres across India. Learn from experts and gain exposure to diverse clinical scenarios in diabetes care.

Our Network of Excellence with Top-Tier Hospitals
